Portfolio : https://vijayreddyvenna.github.io/Portfolio

Skills

- Programming Languages : Java, JavaScript
- Frontend Technologies : HTML, CSS, Bootstrap, ReactJs
- Backend : Servlets, JSP, Spring Boot, REST API's
- Data Base : MySQL, JDBC, Hibernate
- Architecture : MVC Architecture, RESTful services, Microservices
- Tools & Others : Eclipse, VS Code, Git, GitHub

Work Experience

05/2024 – Present
Hyderabad, India

Software Engineer

IScientific Tech Solutions Labs Pvt. Ltd.

- Proficient in developing responsive and interactive user interfaces using **React.js** and **Bootstrap**, delivering modern and intuitive web application experiences.
- Built full-stack applications leveraging **Java**, **JavaScript**, **HTML**, and **CSS**, with a strong emphasis on performance and scalability.
- Experienced in creating backend systems using **Spring Boot**, **Servlets**, **JSP**, and **REST APIs**, following clean **MVC architecture** design.
- Efficiently handled data operations using **MySQL**, **JDBC**, and **Hibernate**, ensuring seamless data access and storage.
- Well-versed in version control and development environments including **Git**, **GitHub**, **Eclipse**, and **Visual Studio Code**.

Projects

12/2025 – 10/2026

IstlGroup CRM & Business development dashboard

- Built a **full-stack CRM application** to manage leads, clients, sales, procurement, analytics, and documents using **React, Spring Boot, and MySQL**.
- Developed responsive **React UI components** (tables, grids, modals, dashboards) with advanced filtering, role-based views, and reusable layouts.
- Implemented **RESTful APIs** in Spring Boot for business workflows including proposals, quotations, invoices, purchase orders, and follow-ups.
- Designed scalable architecture with **activity tracking, audit logs, reporting, and exportable Word/PDF documents**.

03/2025– 09/2025

Building Energy Monitoring System (BEMS)

- Designed and developed a **hierarchical Building Energy Monitoring System** using **Java (Spring Boot), React, and MySQL** to track and analyze power consumption across residential and commercial buildings.
- Designed and developed a **hierarchical Building Energy Monitoring System** using **Java (Spring Boot), React, and MySQL** to track and analyze power consumption across residential and commercial buildings.
- Developed backend services to calculate **peak usage hours, on-time/off-time metrics, total energy consumption**, and efficiency indicators to support performance optimization.

12/2024–02/2025 **Centralized Control Monitoring System (CCMS)**

- Developed a **Java-based Centralized Control and Monitoring System (CCMS)** for real-time monitoring and control of street lighting infrastructure.
- Implemented backend services using **Spring Boot and MySQL** to manage device data, operational status, and control commands.
- Designed APIs to retrieve and process **live device metrics**, including installation counts per location and key operating parameters.
- Built data processing modules to calculate and expose **uptime/downtime hours**, with support for historical analysis and date-based reporting.

Certifications

Hyderabad
09/2023 – 04/2024

Java FullStack Developer Course
Completed Java FullStack Developer Course From Vcube Software Solutions with hands-on project experience.

Chennai
03/2023 – 07/2023

Web Development Course
Received a Certification in Comprehensive web development from Hyse Software Solutions Pvt.Ltd.

Education

2019 – 2023
Gudur, India

Bachelor of Technology in Electronics and Electronics Engineering
Audisankara College Of Engineering and Tecnology
